

Why is global demand for batteries increasing?

This work is independent, reflects the views of the authors, and has not been commissioned by any business, government, or other institution. Global demand for batteries is increasing, driven largely by the imperative to reduce climate change through electrification of mobility and the broader energy transition.

What is the global battery market size?

The global battery market size was estimated at USD 134,622.4 million in 2024 and is projected to grow at a CAGR of 16.4% from 2025 to 2030. The increasing adoption of electric vehicles (EVs) is a significant factor driving the growth of the market.

Where does the battery market come from?

Asia Pacific is currently dominating the global market, with most of the demand coming from China, India, Japan, and South Korea. Mordor Intelligence (TM) provides a comprehensive analysis of the battery market, including a market forecast outlook and a historical overview.

What are the major market drivers for the battery industry?

The major market driver for the battery industry is the growing integration of electronics. Growing demand for transportation also contributes to the market's growth. Fuel savings & government incentives for cleaner transportation boosts the demand for the market.

Why is the battery market growing?

The growth in the battery market is driven by several factors. The rapid adoption of electric vehicles (EVs) is a primary driver, as the demand for high-performance, long-lasting batteries is crucial for extending driving ranges and reducing charging times.

What are the major companies in battery market?

Duracell Inc., Panasonic Corporation, Contemporary Amperex Technology Co. Limited, BYD Co. Ltd and Tesla Inc. are the major companies operating in the Battery Market. Which is the fastest growing region in Battery Market? Asia-Pacific is estimated to grow at the highest CAGR over the forecast period (2024-2029).

Lithium-ion battery manufacturing capacity worldwide in 2023 with a forecast for 2030, by leading region (in gigawatt-hours per year)

The global battery market size was valued at USD 134,622.4 million in 2024 and is expected to grow at a CAGR of 16.4% from 2025 to 2030

CATL (short for Contemporary Amperex Technology) has rapidly ascended to the top of the battery industry, largely due to its focus on R&D, innovation, and strategic partnerships. According to SME Research, CATL

is ...

Catalan companies in the battery sector generated a turnover of EUR1.044 million in 2023, marking a remarkable 53% increase from 2022. This key finding comes from the study "Batteries in ...

Globally, 95% of the growth in battery demand related to EVs was a result of higher EV sales, while about 5% came from larger average battery size due to the increasing share of SUVs ...

The Battery Market is growing at a CAGR of 16.64% over the next 5 years. Duracell Inc., Panasonic Corporation, Contemporary Amperex Technology Co. Limited, BYD Co. Ltd ...

Battery Industry is the world's leading multimedia news provider for industry professionals, a global business news channel. With independent reporting, Battery Industry focuses on the latest ...

The global smart battery market is expanding owing to the soaring demand for smart devices. The batteries are a relatively new development in the battery industry. These batteries are equipped with advanced electronics and software to communicate with devices and provide real-time information about their status.
