

How do I free up disk space on my computer?

Both Windows and macOS have dedicated tools for freeing up disk space on your drives. On Windows, this is called Disk Cleanup (shown below). On macOS, it's Storage Management. By running these tools when you have a couple of minutes, you can recover space by removing downloaded program files, temporary internet files, and more.

What is a Storage Cleaner?

Storage Cleaner is a FREE ALL-IN-ONE security tool that analyzes all of your apps and detects junk (system cache, app cache, uninstalled app residue, Ad cache...) to prevent your phone from running slowly or lagging.

How to clean up C drive Windows 10?

Disk Cleanup It is a Windows Built-in Tool to Clean Up C Drive. The Disk Cleanup tool finds and deletes unnecessary files that the operating system no longer requires. The Disk Cleanup app has a simple interface and lets you clear system files that form a significant part of unwanted files on the system.

How do I Run storage sense?

Click the drop-down box under Run Storage Sense and choose among Every day, Every week, Every month, or During low free disk space. If in doubt, we recommend setting Storage Sense to run only when there is a limited amount of free space available on the disk. You should also check the box next to Delete temporary files that my app aren't using.

How do I clean a hard drive on Windows 10?

On Windows - click the Start icon and search for Disk Cleanup. Select the drive you want to clean and follow the on-screen instructions. For specific categories, press View files to see what will be removed and select OK when you're ready. On macOS - head to Apple menu > System Settings > General > Storage.

How to use system cleanup to clean your computer?

Here is the process to use System Cleanup to clean your computer. Step 1. Open EaseUS Todo PCTrans on your computer. Click "More Tools". Then, click "System Cleanup" and click the "Scan" button to go on. Step 2. When the scan completes, junk files will be listed. Selected the unwanted files.
