

How much does it cost to install solar panels?

For the average 3.5kWp solar installation, business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour - the people who will actually fit your panels and the associated kit. This range should cover all domestic installations, including large jobs with more than 20 panels.

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000, including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar & battery system, as there's currently 0% VAT on both panels and batteries.

Why do solar panels cost so much?

Costs can vary regionally due to labour rates and market competition differences. Additionally, various incentives and schemes, such as feed-in tariffs or government grants, can affect the overall cost of solar panels. These incentives promote renewable energy adoption and can help offset some of the installation costs.

How much does it cost to clean solar panels?

You can also hire someone to do it professionally, which will usually cost around £10 per panel - so the total cost will depend on how many panels you have. If it snows on your panels, don't brush it off, as this will probably cause them damage. It'll melt on its own. To learn more, read our guide to solar panel cleaning.
