

What is the new EU Battery regulation?

Home » Legislation, Rules and Regulations » EU Battery Regulation The new EU Battery Regulation entered into force on 17 August 2023 and brings with it increasingly strict targets on recycling.

How do you mark a battery?

Batteries containing more than 0,004 % lead shall be marked with the chemical symbol "Pb", and batteries containing more than 0,002 % cadmium shall be marked with "Cd". The manufacturer must affix the CE marking to each battery. The manufacturer must draw up an EU declaration of conformity for each battery model.

What is the new EU Battery regulation 2023/1542?

The new EU Battery Regulation 2023/1542 entered into force on 17 August 2023 and covers the whole lifecycle of batteries from production to reuse and recycling. While the Battery Regulation is already in force, further legal documents will be published in the coming years specifying certain aspects of the implementation (see timeline below).

How do I search for a trade mark?

Search by keyword, phrase or image. Search by flag, emblem or hallmark using the Article 6ter Express Database. For trade marks in Jersey and Guernsey, search the Jersey trade mark register or the Guernsey trade mark register. To find trade mark applications accepted in the last week, check:

Which European standardisation organisations are drafting EN standards for batteries?

The European standardisation organisations CEN and CENELEC are currently drafting EN standards addressing performance, durability, safety, and sustainability for batteries, mandated by Standardisation request M/579 from 2021 (the 2021 version was based on a draft Regulation - an amendment is under preparation).

What is a battery passport?

Among the new requirements, for example, is the Battery Passport that goes with every new LMT, industrial (> 2 kWh), and EV battery and contains material pathways, product specifications and lifetime data. General overview page of the European Commission
