

What is the charge rate of a 15ah battery?

A 15AH battery would have a C/3 charge rate of $15\text{AH}/3\text{H} = 5$ amps. As we discuss below, it has been shown that the dominant sealed lead acid technology, VRLA AGM, can be charged at high rates without damage. But the battery manufacturers often say to charge below C/3. The reason for this is found in Linden's Battery Handbook.

When can I order 3000 mAh - 15A continuous discharge - flat top?

3000mAh - 15A Continuous Discharge - Flat Top Order by 3pm (Monday to Friday) for same day dispatch! Priced Individually Cell Supply Ltd only supply authentic and batch tested cells.

Where can I buy a car battery?

At Halfords, we're with you for the journey. Get a car battery check, buy a replacement car battery and have it fitted at Halfords or at home. Buy online or in-store!
