

3000 acres of solar power generation project

Could a solar farm power 100,000 homes in East Yorkshire?

Plans for a solar farm in East Yorkshire - big enough to power 100,000 homes- have gone on public display. Boom Power said the plant would be situated on about 3,000 acres (1,200 hectares) of land between Gribthorpe, Spaldington and Wressle, and Howden. The company said it would be capable of producing 400 megawatts of electricity.

How big would a solar farm be?

People living close to a planned solar farm which would be bigger than any currently built have been invited to meetings with the developers. The Tillbridge Solar project would cover around 3,000 acres (1,214 hectares), with councillors recently saying the size "beggars belief".

How many homes can a solar farm power?

The proposed nine sites will be in and around the villages of Lavendon, Bozeat, Easton Maudit, Grendon, Earls Barton, Mears Ashby and Walgrave. It is claimed by the developer that the solar farm could power more than 115,000 homes, with a lifespan of 60 years.

How many mw can Green Hill solar farm generate?

Developers said Green Hill Solar Farm could generate around 500MW. (Image: Daniel Leal-Olivas PA Wire / Island Green Power) We use your sign-up to provide content in ways you've consented to and improve our understanding of you.
