

How long does a battery warranty last in an electric car?

Manufacturers typically offer battery warranties that last 8 to 10 years or 100,000 miles, whichever comes first. Coverage: Unsurprisingly, the battery warranty in electric cars will provide extended protection for the most crucial component of the vehicle - the battery.

Does the warranty cover given energy battery storage?

In a nutshell, the warranty covers any GivEnergy residential battery storage system installed from 11/09/2023 - no matter which specific battery and inverter model are fitted. What products does the warranty not cover? Different warranties apply for: Please see product datasheets or refer to any existing warranty documents for details.

Is the battery warranty still valid if the warranty lapsed?

The customer was left confused about the options available to them for repairing the battery, believing their vehicle's warranty had expired. Upon further investigation, we found that while the manufacturer's warranty for the EV had lapsed, the battery warranty was, in fact, still valid.

Are batteries covered by a warranty?

Batteries used in a commercial or professional application, such as taxis, driving instructors, emergency services, works vehicles, etc., are not covered by the full term of the warranty but instead come with a 6 month warranty. How does the guarantee work? The guarantee covers any manufacturing defects which arise within the guarantee period.

What does given energy warranty cover?

The new 12 year warranty covers: In a nutshell, the warranty covers any GivEnergy residential battery storage system installed from 11/09/2023 - no matter which specific battery and inverter model are fitted. What products does the warranty not cover? Different warranties apply for:

Will a 12 year warranty be honoured?

All existing extended warranties will be honoured. Moving forward though, the 12 year warranty does away with extended warranties - so we won't be looking to continue offering those out as of 11/09/2023.
