

Where are the largest lithium-ion battery companies located?

Need help with using Statista for your research? Tutorials and first steps The largest lithium-ion battery companies worldwide were located in the Asian continent. China, South Korea, and Japan led the ranking in 2023.

Will a battery swap help Ethiopia's e-mobility industry?

Sasaki pointed out that battery swapping will help address several challenges facing the growth of Ethiopia's e-mobility industry, including a sparse network of public charging stations and the affordability of electric motorbikes. Dodai's electric motorbikes cost about 150,000 Ethiopian Birrs (about 1,220 U.S. dollars).

Why did Ethiopian Investment Holdings partner with Dodai?

Ethiopian Investment Holdings (EIH) and Dodai announced a partnership to promote sustainable transportation across Ethiopia. PHOTO: COURTESY Sasaki added that Dodai sought the partnership to ease its operations because battery swapping is a new business model in Ethiopia.

Who is the largest battery manufacturer in the world?

The Chinese company BYD ranked second with a market share of 15.8 percent, followed by South Korean LG Energy Solution with a market share of 13.6 percent. CATL (Contemporary Amperex Technology Co. Limited) was the largest battery manufacturer, having overtaken its main Chinese, South Korean, and Japanese competitors.

Will Dodai boost Ethiopia's economy?

Sasaki hopes Dodai will also help boost the efficiency of Ethiopia's economy by saving on commute time for the nation's workforce. "In Addis Ababa, the majority of commuters spend three to four hours a day commuting. Half of that time, the three to four hours, you are waiting for a minibus or van.

Will Addis Ababa become a trailblazer in green transportation?

The partnership aims to establish 100 battery swap stations in Addis Ababa by the end of 2025 and increase them to 300 stations by 2026. Additionally, the partnership is expected to create thousands of jobs and help Ethiopia become a trailblazer in green transportation.

Addis Ababa University ranked 1st in Ethiopia and 1211th in the World 2024 overall rankings, while got 77th place for Hydrology and Water resources management and top 50% for 128 other topics.

According to SNE Research, global EV battery usage reached 686.7 GWh from January to October 2024, reflecting an impressive 25.0% year-on-year growth. Let's explore the top 10 companies driving EV battery installations, their key innovations, milestones, and the evolving landscape of lithium battery technology.

The Lithium-Ion Battery (LIB) industry has gained significant importance as a key enabler for electric vehicles. The Federal Democratic Republic of Ethiopia has ambitious plans to ...
