

How many solar panel quotes should I get?

It's recommended to get at least 3 quotes from different solar installers to compare prices and options. Getting multiple quotes allows you to find the best deal and ensures you have a good understanding of the available systems for your home. What information should be included in a solar panel quote?

How do I get a solar panel quote?

Go ahead, get started: The only comparison website for solar quotes for your home. View 100+ solar panel quotes online instantly, no need to wait! Select local installers by experience, warranty, and feedback. Prices are managed by installers, and are calculated automatically for every possible system size, with returns based on your own roof.

Should you compare multiple solar panel quotes?

Comparing multiple solar panel quotes is essential, as it allows homeowners to find the most suitable option in terms of system specifications, costs, energy production, and warranty coverage. Fortunately, free services are available to receive non-binding quotes from up to four vetted solar panel installers, simplifying the process.

What should a solar panel quote include?

A comprehensive solar panel quote should include the system size in kilowatts (kW), number and type of panels, inverter specifications, estimated annual energy production, total cost breakdown, warranty information and projected savings on electricity bills. The quote should also outline any additional costs like permits or roof modifications.

Should you get multiple solar quotes from different installers?

It is better to get multiple solar quotes from different installers as it provides you with multiple options to choose from. To do so, you may visit multiple installers one by one. But it will consume your valuable time and money. By choosing our services you can solve all of these problems in a single platform.
