

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Can solar panels be installed on a sloping roof?

Solar panels must not be installed above the highest part of the roof, excluding the chimney. Panels should protrude no more than 200 mm from the roof or wall surface on pitched roofs. These conditions will also be satisfied if panels are mounted parallel to the roof on a sloping roof. On a flat roof, they shouldn't protrude more than 600 mm.

Can solar panels be installed on a roof or wall?

The installation of solar panels on a roof or wall of a private house is considered to be permitted development (i.e. doesn't require planning permission) provided that: Panels should not be installed above the ridgeline and should project no more than 200mm from the roof or wall surface on pitched roofs.

Do I need planning permission to install solar panels in the UK?

As mentioned above, solar panel installation in the UK is normally allowed without requiring planning permission. However, it will probably be required in some instances, such as properties classified as listed buildings, solar panel installation within conservation areas, or specific types, like ground-mounted solar panels.

Do I need a prior approval for a solar panel installation?

Application to determine if prior approval is required for a proposed: These provide more scope for solar panel installations on buildings (or in the curtilage of a building) and in non-domestic off-street parking areas without needing full or householder planning permission. When will you need to make a prior approval application?

Should solar equipment be mounted on a roof?

If the property is situated on a World Heritage Site or conservation area, solar equipment should not be mounted on a roof that forms the front face of the building or the side of the building visible from a public road. If your property is a listed building, you should consult your local planning officer.

Learn about the essentials of Planning Permission for Solar Panels. Do you need approval? How to apply, and tips for a smooth installation.

If your application is for solar PV equipment only, the minimum grant you can apply for is £15,000 (25% of £60,000). The maximum grant is £100,000 per applicant business.
