

Where can I recycle batteries in the UK?

In the UK, you can find places to recycle batteries everywhere, from shops to recycling centres. It's key to know the rules in your area, as some places, like California, don't let you throw batteries away. Online tools like Earth911's recycling locator and the Call2Recycle programme make it easy to find where to recycle.

How do you dispose of a battery?

Some councils include battery collection in their kerbside recycling service. This lets residents put used batteries with other recyclables. Others need separate drop-off at waste management facilities or special collection points. Single-use lithium batteries can be disposed of in the trash or recycling bin.

Should you recycle used batteries?

Recycling used batteries can help businesses save money in the long run. Instead of paying for disposal fees or fines for improper disposal, recycling can often be a more cost-effective solution, especially when partnering with reputable recycling services. Proper disposal of batteries is regulated by environmental laws and regulations.

Can power tool batteries be recycled?

Power tool batteries can usually be returned to the maker or recycled at hardware stores. For specialised batteries, check with the maker or your local recycling centre. They'll tell you the best way to dispose of them. Recycling these batteries helps save resources and keeps us safe from environmental risks.

Where can I take a 'portable' battery?

You can take most waste batteries to your local supermarket, or any other big shop nearby that sells over 32 kg of batteries a year. There should be a collection point at the premises for 'portable' batteries.

How do you recycle rechargeable batteries?

The Call2Recycle programme has over 34,000 recycling spots for rechargeable batteries. It's a big help for people to recycle their batteries properly. This helps make our planet greener. Local councils also have online recycling guides.

How to dispose of batteries and vapes safely. You should always dispose of batteries and vapes separately from other waste. 1. Battery and vape disposal service (kerbside collection) (not flats) You can put some types of used household batteries and disposable vapes out for collection on the same day as your green or black bin.
