### **SOLAR** PRO. Battery Research in 2022

#### How did battery demand change in 2022?

In China, battery demand for vehicles grew over 70%, while electric car sales increased by 80% in 2022 relative to 2021, with growth in battery demand slightly tempered by an increasing share of PHEVs. Battery demand for vehicles in the United States grew by around 80%, despite electric car sales only increasing by around 55% in 2022.

#### Why did automotive lithium-ion battery demand increase 65% in 2022?

Automotive lithium-ion (Li-ion) battery demand increased by about 65% to 550 GWh in 2022, from about 330 GWh in 2021, primarily as a result of growth in electric passenger car sales, with new registrations increasing by 55% in 2022 relative to 2021.

#### Can battery research change the world?

As they work to solve the mysteries of battery degradation, reveal the true environmental toll of battery production and disposal, and improve the performance of next-generation batteries, battery researchers are hoping their advances can change the world- and our daily lives - for the better.

What percentage of EV batteries are in demand in 2022?

In 2022, about 60% of lithium, 30% of cobalt and 10% of nickel demand was for EV batteries. Just five years earlier, in 2017, these shares were around 15%, 10% and 2%, respectively.

Can we predict the lifespan of lithium-ion batteries?

In an advance that could accelerate battery development and improve manufacturing, scientists have found how to accurately predict useful lifespan of lithium-ion batteries. New research offers the first complete picture of why a promising approach of stuffing more lithium into battery cathodes leads to their failure.

### Which battery chemistry is most popular in 2022?

IEA. Licence: CC BY 4.0 In 2022, lithium nickel manganese cobalt oxide(NMC) remained the dominant battery chemistry with a market share of 60%, followed by lithium iron phosphate (LFP) with a share of just under 30%, and nickel cobalt aluminium oxide (NCA) with a share of about 8%.

Integrated battery research: three trends of CTP, CTC and CTB ... In 2022, the passenger car battery integration shows following trends. Trend 1: Large-scale installation of CTP, CTC, CTB technologies in 2022 In 2022, CTP, CTC and ...
