

What is a Battery Roller Stand?

A Battery Roller Stand is a heavy-duty steel construction with an acid-resistant powder coating. It features spark-proof, poly-sleeved rollers that simplify battery transfers. Several compartment configurations, safety features, and functional additions are available to provide custom solutions.

How does a blind roller work?

The battery power is enough to power the small motorised unit which gently turns the roller to open or close the blind. Depending on the model you choose, the batteries can either sit within the blind roller itself or in a battery tray that is hidden behind the blind fascia. Both options are very neat and tidy.

What is a Rolls battery?

Rolls Battery, formerly known as Surrrette Batteries, is a company known for producing high-quality and durable batteries. The Rolls 6-CS-25PS batteries are Rolls batteries with advantages such as replaceable cells and an expected lifespan of 15-20 years.

What is a tqL25 remote controlled roller blind motor?

Thanks to modern technology of battery motors even that scenario is no longer a problem. The TQL25 remote controlled roller blind motor comes with a built-in rechargeable Lithium-Ion battery as part of a compact and neatly integrated system. The first of its kind in the UK it was designed for convenience in today's increasing automation needs.

How do you charge a tqL25 roller blind?

You just insert the motor into the tube and then fit the roller blind in the normal way. The TQL25 is self-contained with a small charging point on the head of the motor for easy access where it can be charged in its location.

Can a solar panel trickle charge a lithium-ion battery motor?

For those tricky out of the way places there is an answer, you can use a dedicated Solar Panel to trickle charge the Lithium-Ion battery motor. Simply fit the solar panel during the initial installation and plug it into the motor, then you can leave it to the sun to keep you going.

The battery roller stand is made of heavy duty steel to meet OSHA requirements, non conductive roller beds, spring loaded rollers, adjustable leg heights, and a battery safety stop. Options include 2 or 3 battery compartments and stainless steel drip pans that are easy to clean and will not corrode. Compartment rollers come in sizes from 12 ...
