12V wet/sla/vrla battery testers cost from £55 (Ancel BA101 from Amazon) to £240 inc vat (ACT/612 from CPC-Farnell). There's no excuse for a professional Dealer Workshop not being able to test the battery properly and safely.

What is a rechargeable battery tester?

For context, a rechargeable battery is usually around 1.2V fully charged, and a regular one is around 1.5V. Obviously, for larger batteries, this number will be higher.
