

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now](#)

What are battery charging cabinets?

Battery charging cabinets are a type of safety cabinet that's designed especially for lithium-ion batteries. Over the recent years, as the prevalence of lithium-ion batteries has grown in workplaces, battery cabinets have become more popular due to the many risk control measures that they provide.

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

What happens if a lithium battery burns while charging?

Most lithium battery fires occur during the charging phase. Storing and charging batteries in the same place increases the fire risk in an emergency. If a lithium battery starts to burn during charging, this can lead to a chain reaction: The fire of the burning battery spreads to other lithium batteries.

How to choose a lithium battery charging cabinet?

Since the risk of fire is particularly high during the charging phase, a charging cabinet should offer particularly high safety precautions, such as special fire protection seals and alarm functions. A shock-resistant plastic collection container is suitable for the collecting of intact lithium batteries.

What is a Li ion battery storage cabinet?

Thankfully, innovations by Justrite in li ion battery storage are offering consumers and businesses a fire- and explosion-resistant battery cabinet in which to safely charge their li ion batteries. The cabinet houses the batteries during charging while an integral fan keeps the compartment cool to prevent overheating.

Other safety cabinets might not have this feature. So, a battery charging cabinet is the best choice if your workplace uses lithium-ion batteries. **Key Features of a Battery Charging Cabinet. Construction.** Battery charging cabinets are made from sheet steel, which is rugged and long-lasting. They are built to be solid and safe.
