What does a Wh mean on a battery?

The correct symbol for it is Wh. That's the energy stored in the battery, which has nothing to do with time. The larger the number, the more energy it can supply. 1 Wh means if a device consumes 1 W of power, it can last for 1 hour with that amount of energy. However, usage time depends on the power consumption, not energy.

How long does a battery last?

The larger the number, the more energy it can supply. 1 Wh means if a device consumes 1 W of power, it can last for 1 hour with that amount of energy. However, usage time depends on the power consumption, not energy. On the same energy level, the higher the power, the shorter the battery lasts.
