Hi, I recently deleted some apps from my iPhone 15, but I"ve noticed that they"re still showing up in the battery usage section and seem to be consuming power. I thought once apps are deleted, they shouldn"t be using any resources, but my battery is draining faster than usual. (From 40% to 4%) I"ve already restarted my phone

Fortunately, there"s an easy way to remove recently deleted apps from your battery usage. Just follow these simple steps: 1. Open the Settings app on your iPhone. 2. Tap Battery. 3. Select the Show Detailed Usage button at the top of the screen. 4. Find the app or apps that you want to remove from your battery usage history and tap on them.

Blink is small, battery-powered and truly wire-free, so it"s simple to place and move within any environment. Create a system that covers your entryways and windows, monitors the garage, or keeps a watchful eye over the kids" rooms (or even the cookie jar). - "I use Blink to see if the cats got into my garden" - jeweynougat, 25th April 2023.

"Recently Deleted Apps on Battery Usage: Yesterday, I deleted a game on my iPhone (It took up too much space). Just now, I checked to see my iPhones battery usage and I saw "Recently Deleted Apps" on the top of the list -- it"s taking up 25% of my activity! I"ve used android phones before so I"m quite new to this.
