

## **Belgian environmentally friendly battery sales and retail department**

Do you have to take back batteries in Belgium?

If you contributed to this as well, as a manufacturer, importer or installer putting batteries on the Belgian market, then you know that you have to comply with the legal take-back obligation. That means you have to take back the batteries at the end of their life and you are responsible for all aspects related to processing and recycling.

Does bebat offer an environmental contribution for energy storage systems (ESS)?

This situation changed, as Bebat introduced an environmental contribution for Energy Storage Systems (ESS), including home batteries as of 1 January 2022. As a Bebat participant you will need to pay this contribution at the time when the battery enters the market and not when it is taken back in the future.

What is Brussels Research & Innovation Center for green technologies?

Brussels Research and Innovation Center for Green Technologies (BRING) is a nonprofit organization for the development of green and sustainable technologies and solutions. Research and development of various rechargeable energy storage systems and energy technologies for Lightweight and Heavy-duty vehicles, electric vessels and utility scales.

Do you have a legal take-back obligation for home batteries?

2021 saw an unprecedented rise in the number of Energy Storage Systems (ESS), including home batteries, installed. If you contributed to this as well, as a manufacturer, importer or installer putting batteries on the Belgian market, then you know that you have to comply with the legal take-back obligation.

Why does Delhaize use electric car batteries?

Due to the current environmental challenges, Delhaize makes sustainable innovation one of its priorities. Sustainability has been a fixture in Delhaize stores for years. But now Delhaize shifts up a gear and comes up with a first: the reuse of electric car batteries as a backup energy source for the store in the event of a power cut.
