

What is a high voltage capacitor?

High voltage capacitors are used in equipment made to improve Power Factor, and provide voltage /VAR support. The capacitors use time proven, low loss, highly reliable GE all film dielectric systems. Dielektrol®; VIIa Non-PCB insulating fluid is used in our state of the art dielectric fill process.

Who makes high voltage capacitors?

GE Energy's Capacitor and Power Quality Products has been designing and building high voltage capacitor and capacitor equipment for over 60 years. Throughout the years, GE has led the industry in improving the design and manufacturing process of high voltage capacitors, leading to today's all-film, folded foil design.

What is a medium voltage metal enclosed capacitor & harmonic filter bank?

GE's Medium Voltage Metal Enclosed Capacitor and Harmonic Filter Banks are designed for industrial, commercial, and utility power systems requiring medium voltage automatic power factor correction.

What happens if a capacitor is charged in parallel?

The capacitors are charged in parallel and let us consider the capacitor C1, which is charged in parallel with the dc source. Practically during charging, a potential difference exists between the input voltage magnitude and the capacitor voltage magnitude. This causes voltage ripple that is expressed as follows;  $(8) \quad V_c = \frac{1}{C} \int i_c dt$

What is a heavy duty dielectric capacitor?

Heavy Duty all film dielectric capacitors are designed, manufactured and tested to meet the requirements of all applicable ANSI/IEEE, NEMA, and IEC standards. In addition they are designed to exceed the requirements of these standards in terms of continuous (rms) and peak overvoltage withstand capabilities.

What is a 125% overvoltage capacitor?

They are rated for 125% continuous (rms) overvoltage capability and 135% peak overvoltage capability. These capacitors are suitable for industrial power systems that have higher voltages or harmonic loads. CSA labeling is available upon request and 50 Hz are also available upon request.
