

# Carport photovoltaic comes with solar panels

How much electricity does a solar PV carport generate?

Our solar PV carports are capable of generating 3,000kWh of electricity per year, enough to power the average plug-in electric vehicle for over 12,000 miles a year in the UK. That means free car travel for life.

How does a solar carport work?

The roof canopy offers a unitised watertight aluminium frame with solar PV laminated glazing panels. The carport structure incorporates both the solar panels and cabling within its frame, as well as the control panel for both the solar electrical grid connection and electric vehicle charging point (EVCP). Providing points.

Does Polysolar offer a solar carport?

Polysolar offers a range of standard Solar Carport designs as well as bespoke solutions, deploying our unique transparent PV glass or conventional solar panels that form the watertight roof. We also offer integrated EV plugs (from a range of leading manufacturers) as well as integrated battery storage, inverters and lighting where required.

Does Newframe offer a solar carport?

Newframe offers a range of standard Solar Carport designs as well as bespoke solutions, deploying our unique transparent solar glazed PV glass or conventional solar panels that are ideal for the watertight roof.

Why should you choose a solar carport?

Polysolar's unique range of solar carports designed to suite every environment and budget will not only provide a shelter from the weather but can power your car or home. With Polysolar you can be assured that our innovative technology, advanced engineering and latest architectural designs will add value to your home for many years to come.

Can KaraSolar install a solar carport & canopies?

KaraSolar Ltd can supply and install a fantastic range of solar PV carports & canopies. With energy costs constantly on the rise, solar panels for both domestic and commercial use have become an increasingly attractive option. Now your car park can offer all the benefits of solar.
