Is battery energy storage possible in Jordan?

In response to this, Fichtner in collaboration with the Jordanian Ministry of Energy and the transmission system operator, NEPCO, has analyzed the potential for battery energy storage and, in the role of Transaction Advisor, is providing support for implementing a pilot project.

How to reduce energy consumption in Jordan?

Another scenario has been made to decrease the energy from the generation side and store the energy by replacing the diesel generators on the generation side and replace it with 698 GWh PV panels and Lithium-ion storage. The result was savings by 102 million Jordanian Dinar (JD) annually, and 698 GWh from the generation side.
