The average cost of solar panels is £250 to £350 per m2 Find out what costs are involved and what you can expect.

I would like to install a solar panel and battery system which will attach to my mains supply. The solar panel and battery are essentially portable (for campervans etc) but also designed and sold as suitable for permanent installation. The battery will be attached permanently to my consumer unit and the solar panel permanently fixed to my roof.

As an example, there are plenty of solar panels that only protrude a roof's structure by 200mm, reducing the visual impact of solar panels from roads or pathways. Properties that usually require planning permission for solar panels include leasehold premises (flats, apartments, commercial units etc), listed buildings and those located in conservation areas.

The standard cost of installing solar panels in the UK can vary based on system size, the type of solar panels, and installation complexity. Is it still worth installing solar panels in the UK?
