

What is commercial solar?

Commercial solar is the use of solar energy to fulfil the energy needs of a business. Compared to residential systems, commercial solar panels are typically larger to absorb more light, and generate more energy to meet the higher demand of businesses. When it comes down to solar panels for businesses, in most cases the larger the panel the better.

Who is commercial solar PV?

Welcome to Commercial Solar PV, your premier partner in sustainable energy solutions! Specialising in the design, installation, and maintenance of commercial solar PV systems, we empower businesses to harness the power of the sun, reduce energy costs, and minimise their carbon footprint.

Should you invest in commercial solar PV panels for Business Energy?

Target your long term net zero goals and generate your own business energy. Save money on your electricity bills with solar PV panels - with return on investment in as little as 3 years. Why invest in Commercial Solar PV panels for business energy?

What is a commercial solar PV system?

Solar photovoltaic (PV) systems have a range of commercial uses across various sectors. Here are some of the key applications: Commercial Buildings: Solar PV systems can be installed on rooftops or integrated into building designs to supply electricity to offices, shopping centres, and warehouses, reducing energy costs and dependence on the grid.

Are commercial solar panels a good investment?

Commercial solar panel installation can bring many benefits: Over the 25-year lifetime of solar panels, savings can equate to thousands of pounds. A 20kW system can potentially save businesses over £3,000 annually on their electricity bills. Solar panels allow for energy independence and some level of insulation from fluctuating electricity prices.
