Can you swap lead-acid batteries with lithium-ion batteries?

Yes, you can swap lead-acid batteries with lithium-ion ones in many cases. But, you must check if the system fits the new battery's needs. This includes voltage, charging, and space. The right lithium battery, like LiFePO₄ (LFP) or Lithium Nickel Manganese Cobalt (Li-NMC), ensures top performance and life.

Can a lithium ion battery match a lead-acid battery?

When you switch from a lead-acid to a lithium-ion battery, knowing the voltage is key. Lithium-ion batteries, like LiFePO₄, have different voltages than lead-acid ones. For 12V systems, a 4S LiFePO₄ setup can match lead-acid voltages well. But for 24V or 48V systems, you have more options.

Who makes lead acid batteries?

CTT Technical Ltd are global experts in the manufacture of lead acid batteries. We have a range of products to assist you in setting up your operation and keeping it running like clockwork.

What are group 29 and group 31 batteries?

You have a few options when looking for the right battery for your car or truck. Group 29 and group 31 batteries are designed for automotive applications. But there are some key differences between them that you need to be aware of before making a purchase. But what exactly are these groups?

Are lithium-ion batteries more energy-efficient than lead-acid batteries?

Lithium-ion batteries are more energy-efficient. They use up to 30% less energy than lead-acid batteries. This can lead to big savings on energy costs. When looking at ROI, consider the benefits of lithium-ion batteries. They are lighter, which can increase payload capacity. This can also reduce fuel costs.

What types of batteries can a battery machine assemble?

With our machines, you can assemble lead-acid automotive, motorcycle, industrial traction, and stationary batteries as well as lithium-ion energy storage and transportation batteries. Our battery machines can also handle other chemistries, such as sodium-ion.

The battery which uses sponge lead and lead peroxide for the conversion of the chemical energy into electrical power, such type of battery is called a lead acid battery.
