

What is Djibouti's new solar project?

The project will be the first solar Independent Power Project (IPP) in Djibouti and will be located in Grand Bara, south of Djibouti City. The solar project is being fully developed by AMEA Power under a Build-Own-Operate and Transfer (BOOT) model and will generate 55 GWh of clean energy per year, enough to reach more than 66,500 people.

Who will take over the Djibouti electricity project?

The Sovereign Fund of Djibouti (FSD) will be joining the project before financial close as a minority shareholder. The offtaker for the project will be Electricit  de Djibouti. As part of its strategic plan, the Government of Djibouti aims to reduce CO2 emissions by around 40% by 2030.

Why is AMEA power supporting Djibouti?

Hussain Al Nowais, Chairman of AMEA Power, said: "AMEA Power is proud to reach this milestone and to be supporting Djibouti in its energy transition journey. East Africa is an important market for AMEA Power, as it is a region with immense potential for the development of clean, reliable, and affordable energy."

How many people in Djibouti have electricity?

In Djibouti, only 60 percent of the population has access to electricity. There is a large disparity in access between urban and rural areas, with far more city dwellers connected to the grid than those in rural areas. Therefore, approximately 490,000 people in Djibouti do not have electricity.
