

Dual-mode optical thermometer and spectral conversion for c-Si solar cells in Ag clusters and Yb ³⁺ co-doped borate glasses. ... As mentioned in the introduction of this work, ...

Introduction. Whole-cell biotic-abiotic hybrid systems, integrating the functionalities of inorganic nanomaterials and the versatility of biocatalytic networks, provide ...

Typically, the structure of a photo-rechargeable battery system in a dual-electrode mode bears resemblance to that of a Dye-Sensitized Solar Cell (DSSC) and is ...

One type of solar cell with the size of 11.2 mm × 11.5 mm is chosen for the dual-function design. Its multi-layer structure is depicted in Figure 2, which is similar to that in [1]. As ...

Parts of Dual Mode Solar panel Cleaning Machine: High Pressure Pump: The specification of high-pressure pump is 2.8 amps @ pressure of 6.8 Bar (4.0 LPM) is used for pumping water ...

Recent advances in dynamic dual mode systems for daytime radiative cooling and solar heating. Shiqing Zhou, Pengyue Chen, Chunhong Xiao, Yuqing Ge and Hongwen Gao * College of Environmental Science and ...

An, H. Wang, and Y. Luo (2021), In this work, a dual-band single port antenna is proposed, integrated with solar cells, compatible with a 2.4/5 GHz WLAN. 30 solar cells were ...

In this paper, we have proposed a new design solution and successfully developed a novel dual-mode solar spectral converter CaTiO₃: Bi³⁺, Cr³⁺, Yb³⁺ for c-Si ...

This work focuses on the design of composite photoanodes with dual-mode luminescent function as well as the effects of luminescent phosphors on the photoelectric properties of dye ...

A promising dual-mode solar spectral converter CaLaGa₃S₆O:Ce³⁺,Pr³⁺ for Si solar cells has been successfully developed. The structure, photoluminescence excitation and ...

A promising dual-mode solar spectral converter CaLaGa₃S₆O:Ce³⁺,Pr³⁺ for Si solar cells has been successfully developed. The structure, ...

J-V curves (c) and box plots (d) of the (TMA) 2 (MA) 4 Pb 5 I 16 solar cell regulated by dual additives under illumination of 1 sun. High Resolution Image. Download MS ...

Abstract: In this article, a battery-indifferent microcontroller unit (MCU) with wide power-performance scaling is presented to enable continuous operation with a sub-mm² on-chip ...

Here, we harvest solar energy in a dual mode for Cu₂-xSe nanoparticles biomineralization and seawater desalination by inte- ... Whole-cell biotic-abiotic hybrid systems, integrating the ...

In addition, the porous film-based moisture transfer technique can effectively realize broadband dynamic regulation of solar radiation and LWIR, and exhibits astonishing ...

The fluorescent glasses can convert ultraviolet light to visible-infrared region which matches well with the spectral response of c-Si solar cells to improve the conversion ...
