Energy-saving solar installation

Can solar panels save you money?

Solar panels could help you save £100s a year on your electricity bills. Using the energy you generate can mean big savings for some households. You can get paid to export electricity you generate but don't use through the smart export guarantee (SEG). An average home could earn up to £320/year.

Can a home solar system save you money?

A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. Export the electricity you can't use yourself and get paid for it. The Smart Export Guarantee lets you sell extra electricity to the grid.

How do I rent solar panels?

You RENT the solar panels for a fixed period by signing a roof lease agreement. If you rent or lease solar panels from a third party,you'll be required to sign a roof lease so that ownership of the solar panels doesn't pass to you once they're installed.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures,it could take someone living in the middle of the country,in a typical home,anywhere between 11 and 14 years to recoup the costs of installing panels,based on current Energy Price Cap rates.
