

What is a film capacitor?

A film capacitor is a common capacitor type in electronic devices. It is used in various electronic applications due to its unique properties. The growing sales of consumer electronic devices across the world is directly driving the film capacitor market. However, film capacitors are comparatively bulkier than electrolytic capacitors.

Who makes plastic film capacitors?

Suntan is a Hong Kong based manufacturer of plastic film capacitors such as Green Polyester Film Capacitor, Metallized Polyester Film Capacitor, Mini BOX metallized Film Capacitor, X2 Capacitor, Metallized Polyester Film Capacitor, and Polystyrene Film Capacitor, among others. Please refer to the below product list of Plastic Film Capacitors.

Who makes metallized polypropylene film capacitors?

Metallized polyprop... Metallized polyeste... Xiamen Faratronic Co., Ltd., is one of the leading professional manufacturers of film capacitor in the world. The total annual output is 3 billion pcs for film capacitors in 2007 and ranked No. 3 in the world.

What is the global film capacitor market?

The global film capacitor market can be classified into several categories: film type, technology, application, end-use industry, and geography. Based on film type, it can be segmented into dielectric film, metallized plastic film, and hybrid.

What is the analysis of the film capacitor market?

The analysis of the film capacitor market determines profitable trends to gain a stronger foothold. The report presents information related to key drivers, restraints, and opportunities with a detailed impact analysis.

Who uses stacked film capacitors?

Panasonic, Electrolux, LG and Honeywell rely on us. Stacked film capacitors are an excellent choice for high voltage applications due to their low cost, long life and excellent self-healing capabilities.
