

Which phone has the best battery life?

Both of those phones -- the Asus ROG Phone 9 Pro and the OnePlus 13 -- finish first and second on our list of long-lasting phones. With more Snapdragon 8 Elite-powered phones on the way, we expect the top of our best phone battery life list to get very crowded very soon.

How long does a laptop battery last?

The Microsoft Surface Laptop 7 is another Snapdragon-equipped machine with spectacular battery life: 20 hours, to be exact. This result is especially impressive because the battery size is only 54 watt-hours, which is small compared to other laptops of its class (like the 84 watt-hour battery in the Dell Inspiron 16 2-in-1).

Which laptop has the best battery life?

The Windows laptops with the best battery life are currently Snapdragon laptops, which means they're powered by Qualcomm's Arm chips and thus have some compatibility issues with select software. The top MacBooks all run on Apple silicon now and have good software support for everything except games, which are more hit-and-miss on Apple's laptops.

Which mobile phones have the best battery life in 2024?

Here are our top picks for the latest mobile phones with the best battery life in 2024: We are starting off strong with our first choice and although it may not be a popular pick in a generation of iPhone, Samsung and Pixel users, we think that Nubia Redmagic 9 Pro deserves the top spot in our 2024 lineup.

How long does a smartphone battery last?

When you look at phones from before modern smartphones, the batteries would last days compared to hours of smartphones. However, we have seen some amazing progress when it comes to modern smartphone battery longevity. There are now smartphones that don't need to be charged throughout the day and can happily run without issue for more than 16 hours.

Why is battery life important in a mobile phone?

Battery life is the most important feature of any modern mobile phone, it's what powers it up for the day ahead. Most things nowadays have been integrated into our mobile phones, making them irreplaceable. Our mobile phone acts as a way of payment, communication and even an alarm to make sure we're up every morning.
