

What is a solar panel kit?

Our solar panel kits for homes are the ideal way for you to start your own solar power system! With our extensive range of inverters, solar panels, batteries, and mounting hardware, you will be able to easily set up your own renewable energy system with ease.

What does a DIY solar panel kit include?

Our DIY solar panels kits include all of the equipment and ancillary items you need to power your home for years to come with free energy while at the same time reducing, or completely removing, your dependency on over-priced, grid-produced electricity.

What is a 4KW home solar kit?

Get clean, free energy with this 4kW Home Solar Kit designed for large houses. Includes ten solar panels, a Hybrid Inverter and roof mounting accessories.

What is a high power solar panel kit?

High power solar panel kits for off-grid energy - suitable for remote properties, garden offices, sheds, outbuildings, workshops, sports pavillions, emergency power... the uses are endless. If you can't see exactly what you need please contact us - we can customise any kit to suit your requirements.

Why should you invest in solar panels & solar panel kits?

Over time you will also see a return of investment from your home solar panels and solar panel kits as the energy you have saved will cover the cost you paid for the kit in the first place. After this, you will eventually start producing electricity at no expense!

How much space does a solar panel take?

An average solar panel takes about 1.44m² of roof space. Don't forget to include at least 30 cm from the roof's edge so there is enough space for the panels to have air pass through to prevent decreases in efficiency due to heating or (in the case of some arrays) overshadowing each other as the sun changes position.

Home Complete Off-Grid Solar System Packages With Batteries. Complete Off-Grid Solar System Packages With Batteries ... SunGold Power Complete Off Grid Solar Kit 8000W 48V ...

Rail and Panel Installation. The cheapest and most practical way to install solar panels is with a combination of rails and brackets. A secure hook is fastened to the rafters underneath your roof tiles and the rails are attached to these exposed hooks across the length of the solar array.

What Is a DIY Solar Kit? DIY solar panel kits work in exactly the same way as standard solar panels, with the only difference being that you do most of the installation yourself as opposed to contracting a professional
