

How do I charge a power pack?

Connect Power Pack to input cable to furniture power drive. (See reverse for details) Recharging Power Pack: A solid RED LED light will illuminate when the power is at <10% remaining power. Disconnect Power Pack from power drive and follow (step 1-5 above) Complete charging will take between 4-6 hours depending on the Power Pack you purchased.

How long does it take to charge a power pack?

Disconnect Power Pack from power drive and follow (step 1-5 above) Complete charging will take between 4-6 hours depending on the Power Pack you purchased. To prevent damage and prolong the life of the Power Pack, disconnect the charger once the charging cycle is completed. The Power Packs have a short circuit and overload protection system.

When should a power pack be fully charged?

A Power Pack coming from storage should be fully charged prior to being connected to a power drive or control system. (See 1-5 above). It is possible after long periods of storage, several cycles of charging and recharging may be required to restore the performance of the Power Pack.

How do you charge a battery?

Generally speaking, you charge the battery itself via USB-C(input). Speeds differ depending on the battery you choose. Many batteries also still include a standard USB-A port (output). This is for plugging in USB-A-to-Lightning or USB-A-to-USB-C cables for charging your iPhone or Android device.

How many phones can a 20,000 mAh battery charge?

A 20,000mAh battery can charge two phones twice, or a phone twice and a tablet once. Some power banks have enough juice to power laptops. Of course, a higher capacity often translates to a heavier, larger, and more expensive battery. In the end, it's best to assess your typical needs before buying.

Does a power pack require more frequent charging than normal?

Should the Power Pack be used in a system consisting of a microprocessor or any kind of IC such as touch sensors, USB ports, lite cup holder or actuator button(s), the Power Pack may require more frequent charging than normal as those systems are always active and continuously consume power from the Power Pack.
