

What is the global battery market size?

The global battery market size was estimated at USD 134,622.4 million in 2024 and is projected to grow at a CAGR of 16.4% from 2025 to 2030. The increasing adoption of electric vehicles (EVs) is a significant factor driving the growth of the market.

How has the global battery market changed in recent years?

The global battery market has anticipated remarkable growth and transformation in recent years, driven by a convergence of factors such as the increasing adoption of Electric Vehicles (EVs), the expansion of renewable energy systems, and a growing focus on energy storage solutions.

Will the global battery market grow in 2024-2025?

We estimate the global battery market will see 30%-40% annual growth in 2024-2025, mainly supported by our anticipated sales growth of electric vehicles (EVs) in China. Fading EV subsidies in Europe and less aggressive emission standard targets in U.S. could moderate EV sales and battery demand growth in these regions during the period.

What are the key growth enablers of the global battery market?

Key growth enablers of the global battery market: A diverse range of batteries are experiencing increased demand for automotive applications, particularly in electric and hybrid vehicles. An automotive battery plays a vital role in a vehicle's powertrain, functioning independently of the gasoline used for propulsion.

How much is the global battery market worth in 2023-2030?

The global battery market is estimated to reach USD 382.9 Billion by the end of 2030. Which region is estimated to showcase high demand for battery market over the period of 2023-2030?

Why is the battery market growing?

The growth in the battery market is driven by several factors. The rapid adoption of electric vehicles (EVs) is a primary driver, as the demand for high-performance, long-lasting batteries is crucial for extending driving ranges and reducing charging times.

The Grid Scale Battery Market size was valued at USD 7.77 Billion in 2024 and the total Grid Scale Battery revenue is expected to grow at a CAGR of 33.58% from 2025 to 2032, reaching nearly USD 78.80 Billion. Grid Scale Battery ...

The global battery market is projected to reach \$329.8 billion by 2030, growing at a CAGR of 15.8%. The lithium-ion battery market alone is expected to exceed \$182.5 billion by 2030, with an annual growth rate of ...

The battery industry is accelerating plans to develop more affordable chemistries and novel designs. Over the last five years, LFP has moved from a minor share to the rising star of the battery industry, supplying more than 40% of EV demand globally by capacity in 2023, more than double the share recorded in 2020.

The entire lithium battery industry has the potential to grow manyfold in the overseas market, said Pan Helin, dean at Zhejiang University International Business School, during a recent interview with Securities Times. Up until July this year, more than 10 Chinese lithium battery companies have announced their plans for overseas investment.

The global grid-scale battery energy storage market was estimated at roughly 2.1 billion U.S. dollars in 2021. The market is projected to reach the size of more than 21 billion U.S. dollars in ...

The global electricity sector is experiencing remarkable growth, with a rising demand for energy. However, the fluctuating nature of electricity demand has necessitated the adoption of grid-scale battery storage systems to collect and ...

global battery storage inverter market size was USD 1.14 billion in 2024 and market is expected to reach USD 2.16 billion by 2032, exhibiting a CAGR of 8.3% ... Utility Scale industry is the leading part of the application segment. ... The industry report examines the global market, geographic and country-level market sizes, categorization ...

Battery Manufacturing Equipment Market Size & Share Analysis - Growth Trends & Forecasts (2025 - 2030) The Global Battery Manufacturing Equipment Market is segmented by Machine ...

Global Battery Market Analysis The Global Battery Market Size was \$98.0 billion in 2021 and is predicted to grow with a CAGR of 12.1%, by generating a revenue of \$298.1 billion by 2031.

The global battery market size reached USD 138.7 Billion in 2024 and expected to reach USD 306.9 Billion with a CAGR of 8.3% during 2025-2033. ... Some of the major market players in the battery industry include A123 Systems LLC, ...

The global solar battery market size was worth USD 219.3 million in 2023 and is expected to reach an estimated value of USD 562.2 million by 2032 at a CAGR of 16.4% during the forecast period (2024-2032). ... the low cost of nickel-based batteries is a major driving factor for large-scale applications. By end-user. The global solar battery ...

23 ????· Global Battery Industry Forecast to 2030 with Focus on Lithium-Ion, Lead-Acid, and Emerging Technologies Battery Market Battery Market Dublin, Feb. 04, 2025 (GLOBE ...

Global EV Outlook 2023 - Analysis and key findings. A report by the International Energy Agency. ... (NMC) remained the dominant battery chemistry with a market share of 60%, ...

Although the global battery industry was forecast to experience the largest growth in Europe by 2030, ...
Forecast global lithium-ion battery market revenue 2025-2030, by segment.

The Global Battery Recycling Market was valued at USD 26.70 billion in 2023 and is estimated to reach approximately USD 72.80 billion by 2032, at a CAGR of 11.7% from 2024 to 2032.. In the face of growing concerns about resource conservation and environmental sustainability, the market for battery recycling has emerged as a critical answer.

Their global manufacturing capacity was forecast to grow from two to seven terawatt-hours from 2023 to 2030, China accounting for 60 percent of the total in the latter year.
