

How much solar power does Guinea have?

Guinea had an installed PV capacity of just 13 MW at the end of 2020. Infracore Africa, a unit of U.K.-based Private Infrastructure Development Group (PIDG), and Solveo Energie, a unit of French renewable energy developer Solveo, have secured a 25-year power purchase agreement (PPA) for a large-scale solar project under development in Guinea.

What is the 88 MW solar project in Guinea?

The project is likely the first phase of an 88 MW PV project announced by the French government in April 2017. The French authorities said at the time that the project was expected to be built in two 44 MW phases and to be developed by Solveo Energy. Guinea has had very limited development of solar energy to date.

Why do we need solar power in Guinea?

to exploit Guinea's solar power potential in order to diversify the country's energy mix and increase the availability and reliability of power.

Who is developing a solar PV project in Africa?

The project is being developed by InfraCo Africa with the support of Aldwych Africa Developments Ltd, in partnership with experienced French solar PV developer, Solveo Energie S.A.S, a subsidiary of Solveo Développement. The companies bring complementary skills and knowledge to the project.

How much power does Guinea have?

Guinea currently has an installed power generation capacity of around 566 MW, most of which comes from hydropower, and an overall access to electricity of around 26%.
