

Can energy storage improve the resilience of the UK's electricity grid?

Over £32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also maximising value for money. Courtesy of NREL.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

Which energy storage projects are receiving funding today?

The energy storage projects receiving funding today include: Sunamp's EXTEND project, East Lothian, Scotland - will receive £149,893 for a feasibility study to further develop the storage duration of their thermal batteries.

Could LDEs be the UK's first long-term energy storage facility?

DESNZ said the LDES investment scheme "could see the first significant long duration energy storage (LDES) facilities in nearly four decades, helping to create back up renewable power and bolster the UK's energy security.

What is a long duration energy storage cap & floor investment scheme?

The Department for Energy Security and Net Zero (DESNZ) has announced a long duration energy storage (LDES) cap and floor investment scheme to help bring forward more energy storage schemes. DESNZ said the scheme would be administered by Ofgem and is intended to support a significant uplift in the UK's energy storage capacity.

How can energy storage improve our energy resilience?

Accelerating renewables is key to boosting our energy resilience. Energy storage helps us get the full benefit of these renewables, improving efficiency and helping drive down costs in the long term.

In March 2024, the House of Lords Science and Technology Committee said increasing the UK's long-duration energy storage capacity would support the UK's net zero ...

EnergyPathways, which plans to deliver home-grown clean energy to the UK through its project at the Marram gas field, known as the Marram Energy Storage Hub (MESH) ...

The remaining stock stands at 6.4GWh, equivalent to the installed capacity in the European household energy storage market for 8 months. Forecasts suggest the ...

New Installed Capacity of Household Energy Storage Reached 7.2GWh in Germany from January to July, Increasing 100% Year-on-Year ... which led to the ...

The Caulternich Energy Storage project has been resubmitted to Highland Council following changes to the design of the project. The visual impact of the project has been significantly ...

The university project lead is Professor David Howey in the Energy Storage Systems, Dept of Engineering. This project is led by Pivot Power LLP with a consortium of Habitat Energy Limited, Kensa, Oxford City Council, ...

With these projects storing the surplus clean, homegrown energy produced from renewable sources, we can boost our energy security by relying less on fossil fuels, ...

Fidra Energy has secured planning consent for the UK's largest battery storage project, set to be constructed in Yorkshire. Volytica Diagnostics has partnered with Enspired to set a new standard for battery storage system ...

The four long-duration energy storage (LDES) demonstration projects will help to achieve the UK's plan for net zero by balancing the intermittency of renewable energy, ...

Since 2008, as one of top 10 household energy storage manufacturers in China, BYD energy storage has focused on the research and development and application of energy storage ...

These projects will benefit from a share of over £6.7 million to develop new energy storage technologies that can utilise stored energy as heat, electricity or as a low-carbon energy...

Project EXTEND assessed an increase of storage duration and capacity of Sunamp's thermal batteries, combining the thermal storage system and its smart heating ...

The UK's energy regulator, Ofgem, is set to design and deliver the first round of a cap-and-floor mechanism for LDES technology. Following a consultation period held at ...

The Department for Energy Security and Net Zero (DESNZ) has announced a long duration energy storage (LDES) cap and floor investment scheme to help bring forward ...

The growth of installed capacity has made the power system's demand for energy storage more urgent. 1. Home energy storage analysis: German home storage is still ...

SENEC, based in Leipzig, has been developing smart power storage systems and storage-based energy solutions since 2009. More than 150,000 systems have been sold and there is a ...
