

# How many energy storage container companies are there in Guyana

How much energy does Guyana consume?

In 2019, Guyana consumed 0.79 billion KWH of energy. Electricity in Guyana is costly, which poses major challenges for residents and businesses. Guyana does not produce, consume, or import coal. The Guyanese government maintains control over offshore oil development and production.

Where does Guyana's Energy come from?

This page is part of Global Energy Monitor's Latin America Energy Portal. More than 90% of Guyana's total energy supply comes from fossil fuels, with the remainder derived from renewables such as wood and sugar cane residue.

Who owns a petroleum block in Guyana?

Foreign energy companies hold many petroleum blocks in Guyana. Companies of note include ExxonMobil, Hess Corporation, Anadarko Petroleum Company, CGX, and Eco Atlantic.

How much CO2 does Guyana emit a year?

The majority of Guyana's 2.39 million tons of CO2 emissions (3.05 tons per capita) in 2019 were associated with forestry and changes in land use. Guyana's emerging status as a major oil and gas producer is expected to substantially increase the country's greenhouse gas emissions.

How many barrels of crude oil will Guyanese produce a day?

Due to the number of oil discoveries in Guyanese territory the country is forecasted to produce more than 800,000 barrels of crude oil per day by 2026 which is made more desirable for oil companies because of the favorable conditions (high quality crude oil, low breakeven prices, and a favorable regulatory environment).

Will Guyana become ExxonMobil's largest source of fossil fuels?

According to recent estimates, Guyana will become ExxonMobil's greatest single source of fossil fuels worldwide by 2025, with Guyanese oil and gas production outpacing yields from the company's Permian Basin fields in Texas.
