

## How many years of warranty for Haiti s new energy batteries

How do you evaluate a battery warranty?

Battery warranties can be evaluated mainly in two ways: warranty years and cycle life. Warranty years serve as an important component in battery warranties, which guarantee a battery's performance for a fixed number of years. Warranty terms can vary from one type of battery to another.

Should you buy a warranty on a car battery?

For energy storage batteries, purchasing a warranty beyond 10 years does not make much sense, as a significant portion of the battery would likely need to be replaced after that period. Insurance can also be obtained. Operating and maintaining batteries is complex due to the reliance on software to optimize performance. The rates of deterioration of the battery depend on how the battery is used.

What is the warranty on a QH battery?

QH can provide 10-year warranty service for its customers. It is always necessary to think about warranties when you choose batteries, but don't forget there are still many factors that should be taken into consideration: price, performance, and durability. Do some careful research before making a decision, or turn to the QH experts for help.

Does the warranty cover given energy battery storage?

In a nutshell, the warranty covers any GivEnergy residential battery storage system installed from 11/09/2023- no matter which specific battery and inverter model are fitted. What products does the warranty not cover? Different warranties apply for: Please see product datasheets or refer to any existing warranty documents for details.

How long does a lithium battery last?

Standard warranties for lithium-ion batteries cover both performance and defects for two years. Extended warranties can be purchased, but a warranty beyond 10 years does not make much sense because so much of the battery would need to be replaced after year 10. Insurance can also be purchased for longer coverage.

How long do home batteries last?

Home batteries tend to be pretty robust. No-one has a crystal ball, but the well-made batteries will last at least 10 years. The really high quality ones should last as long as 15 years. Warranty periods generally vary from 5 years to 10 years. However, what the warranty document says about degradation is key.
