A short introduction showing the installation of RADIX Screw Piles and bespoke steel platforms for a 50MW battery storage project in the UK.

Step 3: Connect the charging pile to the charging pile. In this step, it should be noted that the positions of the fire line, ground line, and zero line should not be connected incorrectly. After connecting, fix the charging pile upper line cover plate. Step 4: Insert the charging pile into the wall hanging board, and then lock the

Clicking "temp. displaying" at system menu page (see figure 9.3.2.2) could check real-time temperature of charging pile inlet/outlet and DC+/DC- of all vehicle connectors.

In order to reduce the dynamic energy consumption of pile-driving of the anti-flood screw piles, the unsmoothed surface is applied to the screw pile tip to form an anti-flood bionic screw pile.

Fig. 13 compares the evolution of the energy storage rate during the first charging phase. The energy storage rate  $q_{sto}$  per unit pile length is calculated using the equation below: (3)  $q_{sto} = m \cdot c_w \cdot (T_{in\ pile} - T_{out\ pile}) / L$  where  $m$  is the mass flowrate of the circulating water;  $c_w$  is the specific heat capacity of water;  $L$  is the ...
