

Do I need planning permission to install solar panels?

In most cases, planning permission is no longer required to install solar panels on the roof of your private home thanks to the recent extension of the 2008 'Permitted Development' rules by the UK Government. It is therefore typically unnecessary to seek planning permission when installing domestic solar panels.

Is it legal to install solar panels?

It is legal to install your solar panels; however, you must adhere to all building and electrical regulations, which might necessitate professional certification and can affect eligibility for incentive schemes. What happened to the Feed-in Tariff (FIT) scheme?

Can I install solar panels on my property?

If your property is situated in a conservation area, it may be possible to install solar panels under Permitted Rights. However, if the panels are to be installed such that it would be visible from a highway, a planning application and consent from the local authority will be necessary.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Can I Sell my solar panels if I don't have a professional installer?

In short, yes. However, forgoing the help of professional installers will impose a number of additional legal responsibilities on yourself. MCS-Certifications are required for your solar panels when you choose to sell your property with the panels included.

Do I need a professional solar installer?

However, forgoing the help of professional installers will impose a number of additional legal responsibilities on yourself. MCS-Certifications are required for your solar panels when you choose to sell your property with the panels included. This must be carried out by a certified engineer to ensure standards and procedures are upheld.
