

## How to modify the charger cable of the battery pack

How do I charge my Tenergy smart battery pack?

As the picture at the top of the page shows, tape the unused wires down and cover the ends with tape. The recommended Tenergy smart Lithium-Ion charger (TLP4000) will charge the battery pack to the proper voltage and then shut off. The red charging light will turn green.

How much does a Tenergy smart battery charger cost?

The recommended Tenergy smart Lithium-Ion charger (TLP4000) will charge the battery pack to the proper voltage and then shut off. The red charging light will turn green. This charger automatically detects and sets for the correct battery pack voltage. It can charge 3.7V, 7.4V, 11.1V and 14.8V battery packs. The price is about \$20.

How do I connect a new positive cable to a car battery?

You may want to purchase a corrosion inhibitor that you can put on the battery terminal prior to connecting the new cable. This can help ensure the connection from the battery is strong and doesn't become limited as corrosion builds up in your engine bay. Squeeze the inhibitor onto the terminal, then slide the new positive cable connection over it.

How do you replace a negative battery cable?

Run the new negative cable back through the engine bay in the same route the old one took. Use a flashlight to ensure neither cable is coming into contact with any belts. Belts spin at high speeds under the engine bay and can damage battery cables. Place the battery back in the car.

How do you attach a battery to a car battery?

Bolt the bracket that holds the battery back into place to secure the battery. Be sure you placed the battery back in the same way it was before you took it out, so the positive terminal is closer to the positive cable, and the negative terminal is closer to the negative cable. Connect the positive battery cable to the battery.

How does a LiPo battery charger work?

For charging a LiPo battery, the smaller multi-pin connector is used. As shown on the previous page, there is a connection to each battery in a pack. This allows the charger to monitor individual cells and charge each one up independently of the others. This is called balanced charging and allows each cell to be charged to its peak value.

When the battery pack is fully charged, you can stay connected to your console with the charging cable without using battery power or damaging your batteries. You can also charge your ...
