Which EV maker has filed for bankruptcy?

The most high-profile EV maker bankruptcy in recent months has been Fisker, maker of the Ocean SUV. It filed for Chapter 11 bankruptcy in June 2024, after initial order levels for its debut production model fell short of internal expectations.

Why did Northvolt go bankrupt?

Northvolt, a Swedish maker of lithium-ion batteries that once was valued by venture capitalists at nearly \$12 billion, has filed for bankruptcy. Why it matters This is a massive blow to Europe's EV manufacturing goals, as Northvolt was viewed as the best homegrown chance for reducing reliance on China.

Are EV startups going bankrupt?

While a big wave of EV startups have gone bankrupt in the years since the pandemic began, some didn't make it that far. Zhidou was one of China's earliest EV startups, being founded in 2006, and at one point it looked like it was destined for success.

Who owns Northvolt battery?

The Investment Management Corporation of Ontario (IMCO), Canada Pension Plan Investment Board (CPP Investments) and CDPQ have collectively invested around \$1.1bn into the battery maker, according to Reuters. Canadian public pension fund OMERS has also been a long-term backer of Northvolt.

Can HiPhi go bankrupt?

HiPhi is one of the country's most recent failures, with its parent company Human Horizons announcing its bankruptcy in early August 2024. China's legal system makes it difficult for companies to file bankruptcy, and as a result, the situation is usually very dire for those that do end up going bankrupt.
