

How much lithium-ion batteries did the US import from China?

The US imported some \$4 billionworth of lithium-ion batteries from China in the first four months of this year,according to BloombergNEF. A Stihl employee assembling rechargeable batteries for tools.

Will tariffs protect EV batteries?

The White House implied that the latest increase in tariffs would ensure those investments are protectedand can continue as planned. Currently,the US gets most of its lithium-ion batteries from China,but only a small portion of these batteries are for use in EVs.

How will China's EV tariff change in 2024?

According to the official announcement,in 2024,the tariff on EVs imported from mainland China will increase from 25% to 100%,the tariff on lithium-ion EV batteries will increase from 7.5% to 25%,and the tariff on battery parts will increase from 7.5% to 25%.

How will trump's EV tariffs affect EV batteries?

But it was just the latest action in a long-running, bipartisan quest to counter China's growing economic strength and grip on key components of the high-tech and cleantech sectors. Still, Trump's proposed 60% to 100% tariffs would far exceed the ones currently set on batteries, which stand at 28.4% for EV batteries.

Are lithium-ion batteries ticking time bombs?

Staub,C. MRF Operator: Lithium-Ion Batteries are 'Ticking Time Bombs' (Resource Recycling,Inc.,2022). Mayyas,A.,Moawad,K.,Chadly,A. &Alhseinat,E.

Why are China's import tariffs affecting the battery industry?

According to Ali Adim,senior analyst at S&P Global Mobility,"The import tariffs aim to protect the North American battery supply chain from cheaper Chinese products,thereby levelling the playing field for the growing domestic industry.

Green Lithium (2022), backed by the global metals trader Trafigura, 46 received ATF funding for a feasibility study to develop Europe's first large-scale lithium refinery, drawing on spodumene feed to produce lithium hydroxide (for NMC battery chemistries) and lithium carbonate (for LFP chemistries) on Teesside (NOF 2023). 47 Alkemy's wholly owned subsidiary Tees ...

The new administration may raise this tariff further. Considering the storage market, 92% of lithium-ion storage projects deployed this year in the US were LFP, 100% of these cells were sourced from China. By 2026 US-made LFP cells, supported by IRA Production Tax Credits, are projected to cost around USD63 per kWh in 2026.

Batteries imported from China face tariff levies of nearly 150% if all trade actions now under consideration by the U.S. Congress and executive branch come to pass, Clean ...
