

# Lithium battery dangerous goods label identification

Are lithium batteries classified in Class 9 - dangerous goods?

Lithium batteries are classified in Class 9 - Miscellaneous dangerous goods as: or, if inside a piece of equipment or packed separately with a piece of equipment to power that equipment as: UN 3481, Lithium-ion batteries packed with equipment.

Do you need a hazard label for lithium-ion batteries?

For example, air shipments might need a "Cargo Aircraft Only" label if the batteries are not allowed on passenger planes. The United Nations Economic Commission for Europe (UNECE) provides guidelines on the specific hazard labels required for transporting dangerous goods like lithium-ion batteries.

Are lithium batteries hazardous goods?

Lithium batteries are considered as hazardous goods due to the fact that they can overheat and ignite under certain conditions. For specific information on Air Transport, please consult the relevant TNT Reference Document or the applicable regulations.

Are lithium and sodium ion batteries a dangerous goods commodity?

Although some lithium and sodium ion batteries are eligible for transportation as Section II and exempted from certain labelling, packing and documentation requirements, these batteries are still regulated as a dangerous goods commodity, and subject to all other requirements, including dangerous goods reporting.

Are lithium ion batteries dangerous?

Lithium-ion batteries are classified as dangerous goods, requiring a Class 9 hazard label. This label indicates the potential dangers associated with the battery, such as fire or chemical release. The label must be clearly visible on the outside of the packaging. Additional labels may be required depending on the mode of transport.

What are UNECE regulations for lithium ion batteries?

IATA Dangerous Goods Regulations (DGR): This is the global standard for shipping lithium-ion batteries by air, covering all aspects of labeling, packaging, and handling. UNECE Regulations: These regulations govern the transport of dangerous goods by road and rail, including lithium-ion batteries.
