

Can new battery technologies reshape energy systems?

We explore cutting-edge new battery technologies that hold the potential to reshape energy systems, drive sustainability, and support the green transition.

What's going on in the battery industry?

From more efficient production to entirely new chemistries, there's a lot going on. The race is on to generate new technologies to ready the battery industry for the transition toward a future with more renewable energy. In this competitive landscape, it's hard to say which companies and solutions will come out on top.

Which EV battery company has made significant progress in 2024?

Contemporary Amperex Technology Co. Limited (CATL), the world's largest EV battery maker, made significant progress in solid-state batteries in 2024. The company has entered trial production of 20 amp-hour (Ah) solid-state cells, achieving an energy density of 500 Wh/kg--a 40% improvement over existing lithium-ion batteries.

Who is advancing battery technology?

Global battery leaders like CATL, BYD, and Samsung SDI, as well as carmakers like Toyota, Mercedes-Benz, and Hyundai, are advancing the new technology. However, concerns over safety and manufacturing hurdles remain a challenge.

Which companies have made advances in battery recycling technology in 2024?

Several companies made advances in battery recycling technology in 2024. Altilium has developed a hydrometallurgical recycling technology that achieved over 97% lithium recovery from LFP batteries. The company has demonstrated its ability to recycle both LFP and NMC batteries.

Which companies are investing in graphene-based batteries?

Meanwhile, tech giants like Samsung and Huawei are actively investing in graphene-based technologies. According to recent reports, the global graphene battery market is projected to reach \$716 million by 2031, growing at a remarkable CAGR of 23.1%. 10. Lithium-Metal Batteries

Scientists unveil next-gen battery tech that could revolutionize EVs: "This represents a foundational technology" ... Federal law requires all businesses to buy new type of insurance or face hefty ...

New Battery Technology Battery Energy Storage Systems Home Energy Storage Systems ... Nanotech Energy, Soteria Battery Innovation Group, and Voltaplex Energy announce plans to commercialize safe, American-made battery packs for e-bikes.

Der Volkswagen Konzern hat mit der NEW AUTO Strategie die Themen Battery und Charging zum

Kerngeschäft gemacht. Volkswagen Group Technology unter der Leitung von ...

"I was able to draw significantly from my learnings as we set out to develop the new battery technology." Alsym"s founding team began by trying to design a battery from scratch based on new materials that could fit ...

To this end, the BMW Group is developing groundbreaking lithium-ion cell technology for the New Class. The next big step has been taken: Through the rapid development of cell ...

The new material provides an energy density--the amount that can be squeezed into a given space--of 1,000 watt-hours per liter, which is about 100 times greater than TDK"s current battery in ...

The current focus of the FISITA Battery Technology Expert Group is on the development of battery technologies that are economically and environmentally sustainable, and offer performance at a price point that meets customer expectations. ... New Mead Barn, Wickham Hall, Hadham Road, Bishops Stortford, Herts, CM23 1JG ...

The company has developed and in 2020 became the UK electric vehicle battery R& D centre for FPT Industrial, part of the IVECO Group, a world leading manufacturer of commercial vehicles. Our focus has traditionally been automotive, supporting niche vehicle manufacturers through to major vehicle manufacturers and their supply chain with the development and implementation ...

A look at the novel chemistries, pack strategies, and battery types that will power electric vehicles in the months, years, and decades ahead.

The battery technology landscape continues to evolve, driven by the need for cleaner, more sustainable energy solutions. In 2024, battery technology advanced on several ...

The Chinese groups have benefited from a booming domestic EV market, where unit sales of plug-in hybrids and pure battery vehicles jumped from 1.2mn in 2019 to ...

Pixel-by-pixel analysis yields insights into lithium-ion batteries In a first, researchers have observed how lithium ions flow through a battery interface, which could help ...

Alumnus" thermal battery helps industry eliminate fossil fuels. Antora Energy, co-founded by David Bierman SM "14, PhD "17, is commercializing a thermal battery that lets ...

Through the NEW AUTO strategy, the Volkswagen Group has made the topics of Battery and Charging its core business. Under the leadership of Board member Thomas Schmall, ...

From battery management to cell production and recycling - the Volkswagen Group is evolving into a

profitable expert throughout the entire lifecycle of the key ...

On December 18, 2024, CATL unveiled two standardized battery models, #20 and #25, at the Choco-Swap ecosystem conference held in the coastal city of Xiamen. Jointly launched by CATL in collaboration with nearly 100 partners, the Choco-Swap ecosystem marked a historic step toward the standardization of electric vehicle battery swapping. As a global leader in ...
