

What is the energy storage Policy Forum?

The Energy Storage Policy Forum convenes a select audience of stakeholders from across the energy ecosystem - including state and federal regulators, policymakers, storage industry members, utility decision makers, and power sector stakeholders.

Why is Northern Powergrid using a £4 million battery?

Image: Northern Powergrid. UK electrical distribution system operator Northern Powergrid has begun using a £4 million (US\$5.27 million) battery paid for by consumers to sell services to National Grid, despite plans from the national regulator Ofgem to prevent distribution network operators (DNOs) from doing so in future.

Does Northern Powergrid offer grid services?

Northern Powergrid's Darlington battery has begun offering grid services through aggregator Kiwi Power. Image: Northern Powergrid.

The FESS project will set the framework to enable the integration of customer owned ESS to the Northern Ireland network. It will identify and seek to overcome barriers that are currently present to the deployment of energy storage on the network and identify opportunities where ESS could provide wider customer benefits. FESS Consultation
