

Who is parity projects?

Over the last 17 years Parity Projects has been driving the retrofit market on a mission to provide the most cost-effective route to Net Zero of the UK's homes. Our aim is to have a retrofit plan for every home in the country. That starts with an energy model for every house, and we're nearly there.

Why should you use parity projects' portfolio tool?

Parity Projects' Portfolio tool helps by giving us the big picture needed for strategic decisions and the detail needed to plan and deliver individual projects. Parity Projects enabled us to get a much better handle on the efficiency of our stock and the investment required to improve it.

Why should you invest in a Parity Project?

Parity Projects enabled us to get a much better handle on the efficiency of our stock and the investment required to improve it. Now we have the ability to prioritise and target funding on the properties that need it the most. "Portfolio has been a key tool in our net zero strategy.

Is storage space parity a good choice?

Sufficed to say it provides better storage efficiency without compromising fault tolerance. Storage Spaces offers two flavors of parity - "single" parity and "dual" parity, the latter employing an advanced technique called "local reconstruction codes" at larger scales. We recommend using mirroring for most performance-sensitive workloads.

What is parity & how does it work?

The EU-funded PARITY project has delivered the technologies to support this. Its smart contract-enabled, transactive grid and local flexibility market platform backed by IoT and blockchain technologies facilitates energy and flexibility transactions on multiple levels.

How does parity projects help Optivo?

Housing stock analysis to... "Parity Projects' helps Optivo by giving us the big picture needed for strategic decisions and the detail needed to plan and deliver individual projects." Optivo "The data analysis by Parity has delivered what we were hoping for.

The judges said: "Parity Projects has a successful long term track record. We were impressed by their excellent in-depth assessment process... Mind the data gap By David Shewan ... Given ...

The energy storage project utilizes lead-carbon batteries and LiFePo lithium-ion batteries, and averages one daily charge-discharge cycle for storage of solar energy that would ...

The PARITY storage-as-a-service framework includes virtual energy storage (power-to-heat or P2H) and

actual storage (stationary batteries and electric vehicles (EVs)). The P2H model evaluates the thermal ...

Heat pumps, biomass, electric storage heaters, oil, LPG - what are the best options if you are not on the gas network? We give an overview of the options. ... The ...

Parity Projects applies RdSAP in its full potential through the incorporation of more measures; up-to-date pricing, fuel tariffs and carbon factors. this allows users to plan and ...

The PARITY project focuses on 6 main objectives: Objective 1. ... (EVs and batteries) and Virtual Energy Storage (Power-to-Heat). Objective 3. Smart Contracts Enabled Local Flexibility Market ...

Storage-as-a-Service framework efficiently combining Actual Storage (EVs and batteries) and Virtual Energy Storage (Power-to-Heat).

We were recently invited by Ben Adam-Smith from House Planning Help to record a podcast explaining what our award winning Home Energy Masterplan assessment ...

We help local authorities whether they are acting on the climate emergency, are a delivery partner in energy efficiency programmes, or looking to cut the costs of enforcing minimum standards ...

Parity Projects modelled a mix of policy levers to identify the benefits of a green recovery based on cost-optimal retrofit of housing. About; Platform. Portfolio; Pathways; ... save an average £418 on the energy bills for ...

The skirting boards provide a hard surface for storage and spread any load across the polystyrene to stop it being damaged. The rest of the loft will be insulated with mineral wool ...

How have the energy measures we've installed effected out EPC score? EPC score is split into SAP score for energy costs and environmental rating. ... Thanks to the ...

local governments and enterprises to actively prepare, recently [Photovoltaic (pv) information ? WeChat platform of parity project list has been compiled, reference for photovoltaic (pv) ...

In the short term, if achieving a low proportion of energy storage configuration in the domestic market is required, the economics of PV and energy storage projects can be ...

While we usually advise a lead-in time of around 1-2 weeks between signing up for our Home Energy Masterplan service and receiving a visit from one of our expert surveyors, ...

Parity Projects, the data science company with specialism in energy efficiency has secured funding from the Net Zero Innovation Portfolio (NZIP) through the Green Home ...
