

Philippines lithium battery safety cabinet quotation

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) - fire protection from the outside-in. In addition, all models of the ION-LINE offer fire resistance for more than 90 minutes when exposed to fire from the inside-out.

Are asecos Ion-line lithium cabinets safe?

Discover the asecos ION-LINE lithium cabinets for the safe storage and charging of lithium-ion batteries in a fire-protected environment. The ION-LINE cabinet models are specifically designed to meet the highest safety standards. They offer certified fire protection with a 90-minute fire resistance rating from the inside out and outside in.

How to store lithium-ion batteries safely?

This shows how important it is to know how to store lithium-ion batteries safely. Safety cabinets for passive or active storage of lithium-ion batteries according to DIN EN 14470-1 and DIN EN 1363-1 with a fire resistance of 90 minutes (Type 90) - Fire protection from the outside to the inside and from the inside to the outside.

Are lithium-ion batteries safe?

To date, there are no legal guidelines for the storage and supply of lithium-ion batteries. It is therefore up to each company to decide which safety measures to take but, as lithium is a hazardous substance, a Risk Assessment should be conducted to support this.

Why should you use ion-line lithium cabinets?

This is particularly important where personnel may be unfamiliar with some batteries, such as lithium polymer batteries, that are in use. Discover the asecos ION-LINE lithium cabinets for the safe storage and charging of lithium-ion batteries in a fire-protected environment.

Why do you need a lithium ion battery cabinet?

These cabinets effectively prevent a fire from spreading from the outside to the batteries stored inside. At the same time, the risk of a fire inside the cabinet caused by the lithium-ion batteries or accumulators is also minimised because spread to the surrounding area is prevented.
