How to remove a solar panel system safely?

To safely remove a solar panel system, it's essential to know how to disconnect the solar panels from each other. Follow these steps to ensure a smooth and proper process: 1. Turn off the power: Before starting any disconnection, shut down the solar panel system's power source. This step is crucial to prevent any mishaps during the removal process.

How to safely shut down a solar PV system in an emergency?

After removal, clean the panels using a soft cloth and a mild detergent. Store the solar panels away from direct sunlight. Place them flat to prevent warping or damage during storage. You need to know how to safely shut down a solar PV system in an emergency.
