

What is polypropylene film capacitor?

These capacitors are generally using polypropylene film as a dielectric, and these are used for high-frequency high power applications including heating, pulse power energy discharge application, and AC capacitors for electrical distribution. The film capacitor is widely used in different sector, because of their higher characteristics.

What are Polyphenylene sulfide film capacitors?

Polyphenylene sulfide film capacitors are film capacitors with dielectric made of the thermoplastic, organic, and partially crystalline polymer material Poly (p-phenylene sulfide) (PPS), trade name Torelina. They are only produced as metallized types.

What is a Polytetrafluoroethylene film capacitor?

Polytetrafluoroethylene film capacitors are made with a dielectric of the synthetic fluoropolymer polytetrafluoroethylene (PTFE), a hydrophobic solid fluorocarbon. They are manufactured both as metallized and as film/foil types, although poor adherence to the film makes metallization difficult. PTFE is often known by the DuPont trademark Teflon.

What is a polyester film capacitor?

Polyester film capacitors are film capacitors using a dielectric made of the thermoplastic polar polymer material polyethylene terephthalate (PET), trade names Hostaphan or Mylar, from the polyester family. They are manufactured both as metallized wound and stacked versions, as well as film/foil types.

Why are polypropylene film capacitors used in resonant circuits?

Polypropylene film capacitors are specified because of their low electrical losses and their nearly linear behavior over a very wide frequency range, for stability Class 1 applications in resonant circuits, comparable only with ceramic capacitors.

polypropylene film encapsulated with self-extinguishing resin in a box of material meeting the requirement of UL94V-0. Interference suppression, across-the-line capacitor, EMI filter and spark-killer in class X2 applications. Suitable for use in situations where failure of the capacitor would not lead to danger of electric shock. Features

X2 Safety Capacitor Anti Interference X2 Film Capacitor 310V-330V Tinned Copper Clad Steel Wire Anti Interference Box Capacitor Polypropylene Film X2 Type Rustproof Heatproof Pitch 22.5mm X2 Safety Capacitor Fire Retardant ...

MKP64 Hmkp-X1, Metallized Polypropylene Film Anti-Interference Capacitor (Class X1, 330VAC)

US\$0.0171-0.0216 1,000 Pieces (MOQ)

BuxiuGK 6 Pcs Safety Capacitors Removal Interference Capacitors Polypropylene Film 12mm Capacitor Capacitance 0,22µF 275V X2 4.2 out of 5 stars 59 1 offer from \$5.99 \$5.99

The utility model relates to a condenser technical field just discloses an anti-interference high pressure metallization polypropylene film capacitor, including outer protective housing, the lower cover has been cup jointed in outer protective housing's lower part activity, one side fixedly connected with side connecting plate of outer protective housing lower part.

Metallized polypropylene film interference suppression capacitor (Class X2) Features Used for interference suppression, across-the-line applications ... Metallized polypropylene film AC ...

Shop X2 MKP Metallized Polypropylene Film Anti-interference Safety Capacitor 10 Pack. One of many items available from our Capacitors department here at Fruugo! ... X2 MKP Metallized Polypropylene Film Anti-interference Safety Capacitor 10 Pack. Brand: Unbranded; Size: 0.22UF; X2 MKP Metallized Polypropylene Film Anti-interference Safety ...

Widely used in line to ground, line-by-pass, antenna coupling interference suppression circuit, etc.

The utility model discloses a metalized polypropylene film anti-interference capacitor comprising a shell, a capacitor core, pins, insulating filler and metal spraying layers. The exterior of the shell is formed by the bonding of a first cladding layer, a middle layer and a second cladding layer, positioning grooves are arranged in the shell, the capacitor core and the pins are connected in ...

MKP61 type metallized polypropylene film interference suppression capacitor(Class X2) Outline Drawing W H T P h1 d Application and Feature: High voltage?High insulation resistance?Good frequency response speed,Plastic case(UL94 V-0),Epoxy resin

Other cautions The capacitor is a miniaturized design. Please meet the requirements of the specification for use and storage, so as to avoid early failure of capacitance loss.

C62 is a metallized polypropylene film capacitor that is specialized for electrical circuits to enhance safety and minimize electromagnetic interference. Some powerful features that these metallized capacitors offer include the ability to ...

The MPT 2.7µF J 250V capacitor, designed specifically for audio applications as a metallized polypropylene film capacitor, has a nominal capacitance of 2.7µF and a rated voltage of 250V as its core parameters. ... The MPT 2.7µF J 250V capacitor, with its good anti-interference capability and low noise characteristics, helps suppress noise and ...

Huasing Electronics Co., Ltd. Email: sales@mxcapacitor Tel: (86)0513 65085106 Fax:(86)0513 81164838  
P3/3

High voltage polypropylene film capacitors are ideal for use in power electronics applications, including motor control systems, lighting systems, and renewable energy systems. ... MKP104K275V Capacitor: Professional ...

jb Capacitors manufactures X2 Metallized Polypropylene Film Capacitors, also known as Interference Suppression Capacitors or X2 Safety Capacitors, and we offer very competitive prices. This X2 Safety Capacitor has three approval markings: VDE, ENEC, and UL. The following are the features, specifications, and drawing of the X2 Metallized Polypropylene Film Capacitors.
