

Why is USAID building two solar power plants in Haiti?

With the construction of these two solar power plants, USAID and its partners, including the IDB and Government of Haiti, are seeking to improve the economic competitiveness and sustainability of the PIC and its surrounding communes by providing a more affordable and reliable electricity service.

Will USAID finance the construction of a solar power plant?

This large renewable solar energy program initiated by IDB, to which USAID is contributing, will finance the construction of two solar power plants inside the PIC, an 8 MW plant and a 4 MW plant, with a construction value of \$23 million.

Why do we need a solar power plant in Haiti?

USAID Mission Director Chris Cushing remarked, "Improving infrastructure in countries like Haiti fosters stability and accelerates economic growth through job creation, allowing them to progress beyond assistance. These solar power plants will create more opportunities for the residents of Caracol and the surrounding communities."

Who is responsible for the construction of solar power plants?

The construction of these solar plants will be implemented by the Ministry of Finance Technical Operating Unit (UTE/MEF), with technical support from the State energy regulator, Autorit  nationale de r gulation du secteur de l' nergie (ANARSE) and the Ministry of Public Works, Transport and Communication (MTPTC).

What's going on with the Hum solar project?

Progress on the HUM solar project continues as the team installs racking and solar panels on the roof and upgrades wiring inside the hospital. (Photo: Jimmy Forest/PIH)

How will a solar power plant affect Ute?

Pierre Michel Joassaint, Director General of UTE, says: "Thanks to the solar power plant, electricity costs will drop significantly, and the PIC will become more competitive. This should help attract new tenants and create more jobs in the park."
