

Which lithium-ion car batteries will not leave you stranded?

The first Intelligent Lithium-Ion Automotive Battery that won't leave you stranded! Antigravity Batteries has changed the game again with our latest Lithium-Ion Car Batteries. The newest RE-START line of batteries offers built-in WIRELESS Jump-Starting!

Do electric cars have lithium-iron phosphate batteries?

However, you may have noticed that some electric cars are now arriving with lithium-iron phosphate- more commonly known as 'LFP' - batteries. This is a different sort of battery chemistry to the lithium-ion NMC batteries that are still the most common type of battery in electric cars. It's not so much a case of which one's best, though.

What sizes do antigravity batteries re-start car batteries come in?

The Antigravity Batteries RE-START Car Batteries come in EXACT FIT OEM sizes for most all Performance and Passenger Cars. We are the First Lithium-Ion Battery company to offer the most popular BCI sizes including H5/Group 47, H6/Group 48, H7/Group 94R, Group 35 and others.

What is a lithium ion battery?

What is a lithium-ion battery? Lithium-ion (Li-ion) batteries are a relatively new type of rechargeable energy storage cell, with widespread distribution beginning in the 1990s.

Will antigravity make lithium-ion starter batteries available in high-end cars?

In recent years, some automakers have started to make lithium-ion starter batteries available in their vehicles, but the batteries have largely been limited to expensive optional offerings in high-end sports cars from companies like Porsche and McLaren. Antigravity wants to change that.

Which cars have 3 battery sizes?

The 3 battery sizes make up about 90% of the batteries found in most European and most Modern American Performance Cars including Porsche, Audi, BMW, Lamborghini, Ferrari, VW, Dodge Vipers/Chargers/Challengers, Chevy Camaros, and many more.
